### Benefits/Selling Arguments

- You can start ironing immediately, without having to wait.
- The instant steam generator iron emits steam immediately even vertically.
- The self-cleaning function is a guarantee of long life of the iron, it protects it from the onset of limescale which could compromise the functioning of the instant steam generator iron.
- If the appliance is on but not in use, the auto-function is activated after 10 minutes and emits an acoustic signal.

### Benefits/Selling Arguments

- Transform the vertical ironer into a traditional iron thanks to the patented 180° plate rotation system.
- Vertical ironing allows to penetrate deeply into the fibres and regenerate them, to release fabrics and remove creases, odours, and lint.
- Horizontal ironing permits to remove creases, even in the hardest-to-reach places.
- Use the special "trouser folder" accessory to give your garments the perfect crease like in an ironing room.
- In just a few seconds, refresh your clothes with the practical "lint remover brush" accessory.
- For impeccable garments even during your weekends away, the Duetto travel iron is the ideal ally for showing off perfectly creased clothes, shirts, trousers.
- It can be used with or without water.

### Benefits/Selling Arguments

- It allows you to comfortably iron and sanitize hanging garments without using an ironing board, or to make quick touch-ups on jackets, shirts and coats.
- You can use the vertical iron to refresh your child's curtains or aprons, but also to sanitize cushions and sofas in the bedroom and living room if you have 4-legged friends at home.
- It is so comfortable and light that you can put it in your suitcase and always take it with you even on business trips or on vacation.
- It is safe: after 8 minutes of inactivity, it switches off automatically.
- Steamer ready in 30 seconds.
- The appliance must be used with steam. It is forbidden to use it without water.

### Benefits/Selling Arguments

- The glove allows you to keep a hand behind the garment that is being ironed, to keep it taut without getting burned.
- You can iron and refresh dresses, jackets or shirts in a very easy and fast way. Also, ideal to refresh curtains, pillows and sheets with the only power of the steam.

### **Selling Strategies**

Since Ariete is a new brand in the market, the key focus should be on building brand awareness, establishing trust, and highlighting unique product benefits.

1. Managers to carry out PK session with all concerned SPs.
2. Systematic introduction to all customers.
3. Showcase Ariete's unique features (e.g., stylish Italian design, durability, and multifunctionality).
4. Share cleaning and maintenance tips to extend product lifespan.
5. Ensure that the products are displayed properly in a strategic place.
6. Make the customer handle the products, judge the weight, finish and quality.
7. Managers are required to monitor closely and report sales to their director in charge during feedback session – at least once a week
8. All SPs should do their respective telemarketing calls.
9. All SPs must imperatively explain all the use & care instructions when proposing the product.

Wish you good sales!
